

Fire Fighter License Plates

Have you acquired your new license plate yet? They've been available since October 11th and they're great. Our hats off to the Kansas State Fire Fighters Association for sponsoring the design and to Steve Hirsch and the Department of Revenue, Motor Vehicle Division for getting the process worked out and making it painless for us to acquire our tags.

If you are unaware of how to get a fire fighter license plate here's the process. First you must be an active or retired Kansas fire fighter. All fire departments should have been mailed a certification form. This should have come from your county treasurer and was pre-signed by the Kansas State Fire Fighters Association. You must complete your certification form and have it signed by your fire chief. Take the form, along with money for the plate and registration fees to the county treasurer. The fee is \$43.50 plus any registration and tax. You must also take your old license plate and proof of insurance in with you. It's that simple.

Should you have any other questions or if the chief doesn't have the certification form, have the chief contact Steve Hirsch, KSFFA Secretary, Box 296, Oberlin, Kansas 67749, 785.475.2296 or shirsch@swnebr.net or fax 785.475.2060.
